Transportation Research,
Columbia, SC

OSHA 10 Hour Construction Safety
Course

Mr. Dan Dennis owns and operates one of the largest locally owned engineering and construction management firms in South Carolina. He has focused Dennis Corporation efforts to provide quality services in every corner of this state. Mr. Dennis opened Dennis Corporation in 2005 with no major clients, no investors, and no guarantees. The fledgling company worked tenaciously to provide creative solutions for clients, and soon Dennis Corporation's reputation spread as a firm willing to think outside the box and not follow the status quo. Only three years into the company's start, the recession hit the entire nation and everyone that had been enjoying the success of the construction market felt the economic backlash. Dennis Corporation was not immune to this crash. We watched as many larger engineering firms went under. Mr. Dennis' key to survival has always been offering a variety of diverse services. In addition to the firm's expertise in areas of civil engineering, Dennis Corporation offers special inspections, CEI services, expert witness services, marketing and public relations, and vibration monitoring services.

Over the past sixteen years, Dennis Corporation has exceeded \$80 million in revenues; and since 2014, the firm has seen an average growth of 5-10% under Mr. Dennis' management. He holds monthly meetings with management to assure that projections are on track, clients are satisfied, and that each division has the tools for success.

Mr. Dennis is a Citadel graduate with his Bachelor of Science in Civil Engineering and his Masters in Business Administration. He has almost thirty years of experience providing engineering on projects throughout the Southeast. Mr. Dennis has provided management services for large scale Roadway, Bridge, Airport, Site Design, and Dam projects in South Carolina.

He has been recognized as South Carolina's Small Business Person of the Year and as a Workforce Innovator by the SBA. Mr. Dennis is an award winning engineer with a long history of successful projects.
